Photography

WORK EXPERIENCE

Puma Solutions I.T Consultancy Limited / Carlisle / 2019 - Present **Website Designer; Office Manager**

Originally starting out as a trainee I have quickly progressed to manage the office. My responsibilities include designing & developing multiple websites for small to medium businesses, server management & customer relations. Most of the websites that I have designed have been built using the WordPress CMS. I self-taught on Elementor for a variety of designs that I have worked on, and I am currently working towards building custom themes that fully utilise the WordPress CMS.

I have also been managing the servers for the business covering all aspects (since March 2020), have overseen customer relations & developed workflow management systems introducing Trello & the Hubspot CRM into the business for the first time to help manage tasks & customers efficiently. I have also prepared business cases for the procurement of next gen servers.

Brewers Fayre Howgate / Whitehaven / 2016 - 2019 **Front of House; Bar Staff; Kitchen Staff; In-Restaurant Trainer**

In this role I picked up a variety of customer service & interpersonal skills. These skills were essential for developing customer relationships & keeping customers happy. I was also in charge of training new members of staff (Front of House & Bar). To support this role, I was then trained up in the kitchen. Amongst other things, I learned to work in a high-pressure environment where speed & thinking on your feet was crucial.
